# **Alok Ranjan**

alokraj3850@gmail.com | +91 9939732514 | Delhi

## **CAREER OBJECTIVE**

Skilled in Python, cloud computing, bash scripting, and data analysis, seeking opportunities to apply my technical expertise and handson experience to contribute effectively in a dynamic work environment and further develop my professional skills.

## **WORK EXPERIENCE**

## Campus Ambassador • Internship

Sep 2024 - Present

IIT Delhi — Rendezvous'24, Virtual

Ambassador | IIT Delhi Rendezvous 2024 Promoted Asia's largest cultural fest across multiple channels, driving participation and engagement. Built relationships with participants and sponsors to build festival outreach.

## **EDUCATION**

## Bachelor of Science (B.Sc),

2024 - 2028

Indian Institute Of Technology Madras

## Bachelor of Technology (B.Tech), Electronics and Communication

2024 - 2028

Galgotias College Of Engineering And Technology

# TRAININGS / CERTIFICATIONS

## Google Cloud Skills

Sep 2024 - Present

Google, Virtual

Enrolled in training focused on Google Cloud platform service and architecture.

## **Generative AI Course**

Aug 2024 - Present

Linkedin, Virtual

Gained knowledge in Al models and their applications in real world scenarios.

## CS-50 Courses

May 2024 - Present

Harvard University (edX), Virtual

Covered foundational programming concepts, algorithms and problem solving in computer science.

# PORTFOLIO

## GitHub link **₹**

# **PROJECTS**

## **Microsoft Student Ambassadors Program**

Sep 2024 - Present

Microsoft, Virtual

Currently learning cloud computing fundamentals with a focus on Azure.

## **Google IT Support Professional Certificate**

Jul 2024

Google, Virtual

Completed coursework on IT support, networking, operating systems, system administration and security.

# **Enabling Cloudflare DNS System - Wide for Android**

7

Jun 2024 - Jul 2024

Developed a Magisk module to enforce Cloudflare DNS (1.1.1.1) across all Android network traffic, enhancing privacy, security, and speed. The module replaces default DNS configurations system-wide, ensuring that all app and system-level requests are routed through Cloudflare DNS. It's optimized for compatibility with various Android ROMs and minimal battery usage. This project highlights my skills in Android system customization, networking, and scripting, focusing on improving DNS performance and security for users.

## Telecom Data Analysis Project **₹**

Jul 2024

Created as part of a project during my studies at IIT Madras
Developed a comprehensive analysis of telecom data, comparing
ratings and call drop rates. Designed and implemented a Google
Site to present findings and insights.

## **SKILLS**

Bash

JavaScript

- Python
- Microsoft Azure

- HTML&CSS
- Google Cloud Computing

## **EXTRA CURRICULAR ACTIVITIES**

• Open-Source Contributions – Developed Magisk modules and scripts for Android and Linux on GitHub. Custom Android Development – Experience in rooting, ROM customization, and system automation.

# **ADDITIONAL DETAILS**

• Personal Projects: Developed custom scripts and tools for enhancing system performance and user experience on Linux and Android platforms. Interests/Hobbies: Passionate about advancements in AI, cybersecurity, and software development.
